CRYPTO ASSET RISK DISCLOSURE

Nobody Sausage (NOBODY)

Last updated on September 4, 2026

Disclaimer

Please note that this risk disclosure is not exhaustive of all risks associated with trading NOBODY. Investors should perform their own assessment to determine the appropriate level of risk for their personal circumstances. Be sure to do your own research and due diligence while taking into account your own financial situation and risk tolerance. Please review the Risk Summary for additional discussion of general risks associated with the assets made available in the platform. These materials are for general information purposes only and are not investment advice or a recommendation or solicitation to buy, sell or hold any crypto asset or to engage in any specific trading strategy. The information contained in this risk disclosure is based on publicly available information that may be inaccurate, incomplete, or change at any time.

What is Nobody Sausage and how does it work?

NOBODY is a community led meme token on the Solana blockchain, centered around the animated Nobody Sausage character created by visual artist Kael Cabral. The project brings together participants who engage through memes, humor, and internet culture. It focuses on shared entertainment and collective identity, with no stated utility beyond community expression and cultural participation.

Who is behind the project?

Nobody was founded by Kael Cabral.

Tokenomics of Nobody Sausage

The total supply of NOBODY is 1 billion tokens.

General Risks

Like all other digital assets, there are some general risks to investing in *NOBODY*. These include short history risk, volatility risk, liquidity risk, demand risk, forking risk, code defects, cryptography risk, regulatory risk, concentration risk, electronic trading risk and cyber security risk. For more information on general risks associated with smart contracts and digital assets, see Kraken's Risk Statement.

Risks specific to Nobody Sausage

Competition

The Nobody Sausage network faces competition from other meme-based cryptocurrencies such as Dogecoin, Dogwifhat, PEPE, and others. NOBODY's value derives from its broader adoption in the market. If the Nobody Sausage network fails to achieve sufficient adoption compared to the other options in the market, this could negatively impact the value of NOBODY.

Due Diligence

Prior to listing on the Kraken platform, Kraken performed due diligence on NOBODY and determined that NOBODY is unlikely to be a security or derivative under UK securities legislation. Our analysis generally includes, but is not limited to, reviewing publicly available information on the following:

- The creation, governance, usage and design of NOBODY, including the source code, security and roadmap for growth in the developer community and, if available, the background of the developer(s) that created NOBODY;
- The supply, demand, maturity, utility and liquidity of NOBODY;
- Material technical risks associated with NOBODY, including any code defects, security breaches and other threats concerning NOBODY and its supporting blockchain (such as the susceptibility to hacking and impact of forking), or the practices and protocols that apply to them; and
- Legal and regulatory risks associated with NOBODY, including (i) any pending, potential, or prior civil, regulatory, criminal, or enforcement action relating to the issuance, distribution, or use of NOBODY, and (ii) consideration of statements made by any regulators or securities regulatory authorities in the UK, other regulators of the International Organization of Securities Commissions, or the regulator with the most significant connection to NOBODY about whether NOBODY, or generally about whether the type of crypto asset, is a security and/or derivative.
