CRYPTO ASSET RISK DISCLOSURE

LOCKIN

Lock In (LOCKIN)

Last updated on 13 August, 2025

Disclaimer

Please note that this risk disclosure is not exhaustive of all risks associated with trading LOCKIN. Investors should perform their own assessment to determine the appropriate level of risk for their personal circumstances. Be sure to do your own research and due diligence while taking into account your own financial situation and risk tolerance. Please review the [Risk Summary](#) for additional discussion of general risks associated with the assets made available in the platform. These materials are for general information purposes only and are not investment advice or a recommendation or solicitation to buy, sell or hold any crypto asset or to engage in any specific trading strategy. The information contained in this risk disclosure is based on publicly available information that may be inaccurate, incomplete, or change at any time.

What is Lock In and how does it work?

Lock In (LOCKIN) is a meme token deployed on the Solana blockchain (SPL standard). It is community-oriented and references the internet catchphrase “lock in,” associated with focus and commitment. The project’s public site provides links to its Solana contract address and basic materials (e.g., a PFP image generator). The token operates as a freely transferable SPL asset on Solana with no formalized on-chain utility beyond community usage. Transfers, custody and trading follow Solana’s normal token program mechanics.

Who is behind the project?

LOCKIN originated from an anonymous creator in March 2024. Ownership was subsequently renounced, with a community takeover reported on July 5, 2024. The project is volunteer-run and community-organized; there is no identified single owner or development company at this time.

Tokenomics of Lock In (LOCKIN)

LOCKIN is an SPL token with a stated maximum supply of 999,999,999. Live supply figures from reputable trackers indicate that almost all tokens are already in circulation; the project’s site states that liquidity is burned and no administrative “keys” remain. There is no listed treasury allocation on official materials reviewed. Percentages refer to the max supply as of August 13, 2025.

Category	Percentage
Circulating supply (approx.)	99.44%
Remaining to max supply (approx.)	0.56%

General Risks

Like all other digital assets, there are some general risks to investing in PRO. These include short history risk, volatility risk, liquidity risk, demand risk, forking risk, code defects, cryptography risk, regulatory risk, concentration risk, electronic trading risk and cyber security risk. For more information on general risks associated with smart contracts and digital assets, see Kraken's Risk Statement.

Risks specific to Lock In (LOCKIN)

Competition

LOCKIN faces competition from other meme tokens on Solana such as BONK, dogwifhat (WIF), and POPCAT. LOCKIN's value derives from its community adoption and online presence. If LOCKIN fails to achieve sufficient adoption compared to the other options in the market, this could negatively impact the value of LOCKIN.

Due Diligence

Prior to listing on the Kraken platform, Kraken performed due diligence on LOCKIN and determined that Kraken was permitted to make LOCKIN available for trading to UK users, in compliance with UK law. This process generally consists of reviewing publicly available information on the following:

- The creation, governance, usage and design of LOCKIN, including the source code, security and roadmap for growth in the developer community and, if available, the background of the developer(s) that created LOCKIN;
- The supply, demand, maturity, utility and liquidity of LOCKIN;
- Material technical risks associated with LOCKIN, including any code defects, security breaches and other threats concerning LOCKIN and its supporting blockchain (such as the susceptibility to hacking and impact of forking), or the practices and protocols that apply to them; and
- Legal and regulatory risks associated with LOCKIN, including (i) any pending, potential, or prior civil, regulatory, criminal, or enforcement action relating to the issuance, distribution, or use of LOCKIN, and (ii) consideration of statements made by any regulators or securities regulatory authorities in the UK, other regulators of the International Organization of Securities Commissions, or the regulator with the most significant connection to LOCKIN about whether LOCKIN, or generally about whether the type of crypto asset, is a security and/or derivative.

Don't invest unless you're prepared to lose all the money you invest. This is a high-risk investment and you should not expect to be protected if something goes wrong. [Take 2 mins to learn more.](#)
