CRYPTO ASSET RISK DISCLOSURE

DGrid AI (DGAI)

Last updated on 27 January 2026

Disclaimer

Please note that this Crypto Asset Statement is not exhaustive of all risks associated with trading DGAI. Investors should perform their own assessment to determine the appropriate level of risk for their personal circumstances. Be sure to do your own research and due diligence while taking into account your own financial situation and risk tolerance. Please review the Risk Summary for additional discussion of general risks associated with the assets made available in the platform. These materials are for general information purposes only and are not investment advice or a recommendation or solicitation to buy, sell or hold any crypto asset or to engage in any specific trading strategy. The information contained in this Crypto Asset Statement is based on publicly available information that may be inaccurate, incomplete, or change at any time.

What is DGAI and how does it work?

DGrid AI is a decentralized AI infrastructure platform that aims to provide blockchain-based access to AI inference services, such as large language models (LLMs) and AI agents. DGrid AI is designed to connect users, AI model providers, and node operators through a decentralized network that routes AI requests, verifies outputs, and settles payments on-chain. The design focuses on reducing reliance on centralized AI platforms and improving transparency and auditability of AI inference.

At the time of writing, the token is not live. The team plans for the DGAI token to be used for paying AI inference fees, staking to access and secure the network, earning rewards by running nodes and providing AI services, and participating in protocol governance. Users would pay DGAI to request AI services, while node operators would stake DGAI to operate nodes and receive rewards based on activity and performance.

Who is behind the project?

DGrid AI was founded by Yunpeng Ding, who serves as Founder and Chief Executive Officer.

Tokenomics of DGAI

The total supply of DGAI is 1 billion tokens, which is distributed as follows:

DGAI Allocation	% of Total supply
Nodes	50%
Community	15%

Team Incentives	10%
Investors	10%
Airdrops	7.5%
Initial Liquidity	7.5%
Total	**100%**

General Risks

Like all other digital assets, there are some general risks to investing in DGAI. These include short history risk, volatility risk, liquidity risk, demand risk, forking risk, code defects, cryptography risk, regulatory risk, concentration risk, electronic trading risk and cyber security risk. For more information on general risks associated with smart contracts and digital assets, see Kraken's Risk Statement.

Risks specific to DGAI

Competition

The DGrid AI platform faces competition from other decentralized AI infrastructure platforms such as Bittensor, and many others. DGAI's value derives from its broader adoption in the market. If the DGrid AI platform fails to achieve sufficient adoption compared to the other options in the market, this could negatively impact the value of the DGAI.

Due Diligence

Prior to listing on the Kraken platform, Kraken performed due diligence on DGAI and determined it was permitted to make DGAI available for trading to UK users. Our analysis generally includes, but is not limited to, reviewing publicly available information on the following:

- The creation, governance, usage and design of DGAI, including the source code, security and roadmap for growth in the developer community and, if available, the background of the developer(s) that created DGAI;
- The supply, demand, maturity, utility and liquidity of DGAI;
- Material technical risks associated with DGAI, including any code defects, security breaches and other threats concerning DGAI and its supporting blockchain (such as the susceptibility to hacking and impact of forking), or the practices and protocols that apply to them; and
- Legal and regulatory risks associated with DGAI, including (i) any pending, potential, or prior civil, regulatory, criminal, or enforcement action relating to the issuance, distribution, or use of DGAI, and (ii) consideration of statements made by any regulators or securities regulatory authorities in the UK, other regulators of the International Organization of Securities Commissions, or the regulator with the most significant connection to DGAI about whether DGAI, or generally about whether the type of crypto asset, is a security and/or derivative.

Don't invest unless you're prepared to lose all the money you invest. This is a high-risk investment and you should not expect to be protected if something goes wrong. Take 2 mins to learn more.
