

PAYWARD LTD
CRYPTO ASSET RISK DISCLOSURE
UnifAI Network (UAI)

Last updated on June 19, 2025

Disclaimer

Please note that this risk disclosure is not exhaustive of all risks associated with trading UAI. Investors should perform their own assessment to determine the appropriate level of risk for their personal circumstances. Be sure to do your own research and due diligence while taking into account your own financial situation and risk tolerance. Please review the [Risk Summary](#) for additional discussion of general risks associated with the assets made available in the platform. These materials are for general information purposes only and are not investment advice or a recommendation or solicitation to buy, sell or hold any crypto asset or to engage in any specific trading strategy. The information contained in this risk disclosure is based on publicly available information that may be inaccurate, incomplete, or change at any time.

What is UnifAI Network and how does it work?

UnifAI Network is designed as decentralized infrastructure for an autonomous AI-agent economy. It combines a cross-chain security and interoperability layer with a “Dynamic Service Network” that indexes Web3 resources in real time, plus a collaboration framework enabling AI agents to discover, negotiate, and execute complex multi-agent workflows, all without a central intermediary. Agents and users interact via smart contracts deployed across multiple blockchains, facilitating secure service discovery, negotiation, payment, and dispute resolution.

At the time of writing, the token is not live. The team plans for UAI to be used for purchasing AI agent services and tools on the platform, participating in governance voting, and staking as collateral to guarantee service quality; under performance may result in slashing of the staked tokens.

Who is behind the project?

UnifAI Network was co-founded by Sunny Yang He and Yilun Zhang.

Tokenomics of UAI

The total supply of UAI is 1 billion tokens which is distributed as follows:

UAI Allocation	UAI tokens	% of Total supply
Simple Agreement for Future Tokens 0	53,5 million	5.35%
IDO	20 million	2.00%
Market Making	50 million	5.00%
Protocol Development	200 million	20.00%

Ecosystem / Community	200 million	20.00%
Foundation / Treasury	226,5 million	22.65%
Team&Advisor	150 million	15.00%
Marketing	100 million	10.00%
Total	1 billion	100%

General Risks

Like all other digital assets, there are some general risks to investing in UAI. These include short history risk, volatility risk, liquidity risk, demand risk, forking risk, code defects, cryptography risk, regulatory risk, concentration risk, electronic trading risk and cyber security risk. For more information on general risks associated with smart contracts and digital assets, see Kraken's Risk Statement.

Risks specific to UAI

Competition

The UnifAI Network faces competition from other autonomous AI-agent infrastructure platforms such as Fetch.ai, Ocean Protocol, and many others. UAI's value derives from its broader adoption in the market. If the UnifAI Network fails to achieve sufficient adoption compared to the other options in the market, this could negatively impact the value of UAI.

Due Diligence

Prior to listing on the Kraken platform, Kraken performed due diligence on UAI and determined that UAI is unlikely to be a security or derivative under UK securities legislation. Our analysis generally includes, but is not limited to, reviewing publicly available information on the following:

- The creation, governance, usage and design of UAI, including the source code, security and roadmap for growth in the developer community and, if available, the background of the developer(s) that created UAI;
- The supply, demand, maturity, utility and liquidity of UAI;
- Material technical risks associated with UAI, including any code defects, security breaches and other threats concerning UAI and its supporting blockchain (such as the susceptibility to hacking and impact of forking), or the practices and protocols that apply to them; and
- Legal and regulatory risks associated with UAI, including (i) any pending, potential, or prior civil, regulatory, criminal, or enforcement action relating to the issuance, distribution, or use of UAI, and (ii) consideration of statements made by any regulators or securities regulatory authorities in the UK, other regulators of the International Organization of Securities Commissions, or the regulator with the most significant connection to UAI about whether UAI, or generally about whether the type of crypto asset, is a security and/or derivative.

Don't invest unless you're prepared to lose all the money you invest. This is a high-risk investment and you should not expect to be protected if something goes wrong. [Take 2 mins to learn more.](#)
