PAYWARD CANADA INC.

CRYPTO ASSET STATEMENT

YOM

Last updated on 03 February 2026

Disclaimer

Payward Canada Inc. (Kraken) is registered under Canadian securities laws as a restricted dealer and is offering Crypto Contracts on crypto assets in reliance on a prospectus exemption contained in the exemptive relief decision [Re Payward Canada Inc.] dated 04/01/2025 (the Decision). The statutory rights in section 130.1 of the Securities Act (Ontario), and, if applicable, similar statutory rights under the securities legislation of each other province and territory in Canada, do not apply in respect of the Crypto Asset Statement to the extent a Crypto Contract is distributed under the prospectus relief in the Decision.

No securities regulatory authority has expressed an opinion about the Crypto Contracts or any Crypto Assets (as defined in the Risk Statement) made available on the Kraken platform, including an opinion that YOM is not itself a security and/or derivative. Changes to applicable law may adversely affect the use, transfer, exchange, or value of any of your crypto assets, and such changes may be sudden and without notice.

Please note that this Crypto Asset Statement may not be exhaustive of all risks associated with trading YOM. Please review the Risk Statement and Fee Schedule for additional discussion of general risks and transaction fees associated with the Crypto Contracts and Crypto Assets made available through the Canadian Platform. These materials are for general information purposes only and are not investment advice or a recommendation or solicitation to buy, sell or hold any crypto asset or to engage in any specific trading strategy. The information contained in this Crypto Asset Statement is based on publicly available information provided by third parties.

What is YOM and how does it work?

YOM is a decentralized cloud gaming network designed to stream high performance games directly to users without downloads or local hardware requirements. The network is built around a distributed set of independently operated nodes that provide GPU compute at the edge, enabling low latency game streaming through peer to peer pixel streaming. YOM's architecture is intended to reduce reliance on centralized cloud providers by coordinating existing consumer hardware into a shared gaming infrastructure.

YOM is planned to be used to pay node operators for providing game streaming services, to be staked by node operators in order to operate streaming nodes and earn rewards, to be staked by token holders to earn rewards and support ecosystem participation, and to be used for protocol governance.

Who is behind the project?

YOM was co-founded and led by Jorrit Velzeboer (CEO), Andrew Pringle (CCO), Jeff Outlaw (CXO), and Rohan Solanki (CTO).

Tokenomics of YOM

The total supply of YOM is 750 million tokens, which is distributed as follows:

Category	Percentage
OPEX	37.5%
Ecosystem	34.9%
Liquidity pool	12%
Community	9.1%
CEX Round	3.2%
Private Round	3%
KOLs	0.1%
Collabs	0.1%
Total	**100%**

General Risks

Like all other digital assets, there are some general risks to investing in YOM. These include short history risk, volatility, and liquidity risk, demand risk, forking risk, code defects, cryptography risk, regulatory risk, concentration risk, electronic trading risk and cyber security risk. For more information on general risks associated with smart contracts and digital assets, see Kraken's Risk Statement.

Risks specific to YOM

Competition

The YOM network faces competition from other decentralized cloud gaming infrastructures such as DeepLink Protocol, Aethir, and many others. YOM's value derives from its broader adoption in the market. If the YOM network fails to achieve sufficient adoption compared to the other options in the market, this could negatively impact the value of YOM.

Due Diligence

Prior to listing on the Kraken platform, Kraken performed due diligence on YOM and determined that YOM is unlikely to be a security or derivative under Canadian securities legislation. Our analysis generally includes, but is not limited to, reviewing publicly available information on the following:

- The creation, governance, usage and design of YOM, including the source code, security and roadmap for growth in the developer community and, if available, the background of the developer(s) that created YOM;
- The supply, demand, maturity, utility and liquidity of YOM;
- Material technical risks associated with YOM, including any code defects, security breaches and other threats concerning YOM and its supporting blockchain (such as the susceptibility to hacking and impact of forking), or the practices and protocols that apply to them; and
- Legal and regulatory risks associated with YOM, including (i) any pending, potential, or prior civil, regulatory, criminal, or enforcement action relating to the issuance, distribution, or use of YOM, and (ii) consideration of statements made by any regulators or securities regulatory authorities in Canada, other regulators of the International Organization of Securities Commissions, or the regulator with the most significant connection to YOM about whether YOM, or generally about whether the type of crypto asset, is a security and/or derivative.
