

# PAYWARD CANADA INC.

## CRYPTO ASSET STATEMENT

### AVNT

Last updated on June 08, 2025

#### Disclaimer

*Payward Canada Inc. (Kraken) is registered under Canadian securities laws as a restricted dealer and is offering Crypto Contracts on crypto assets in reliance on a prospectus exemption contained in the exemptive relief decision [Re Payward Canada Inc.](#) dated 04/01/2025 (the Decision). The statutory rights in section 130.1 of the Securities Act (Ontario), and, if applicable, similar statutory rights under the securities legislation of each other province and territory in Canada, do not apply in respect of the Crypto Asset Statement to the extent a Crypto Contract is distributed under the prospectus relief in the Decision.*

*No securities regulatory authority has expressed an opinion about the Crypto Contracts or any Crypto Assets (as defined in the Risk Statement) made available on the Kraken platform, including an opinion that AVNT is not itself a security and/or derivative. Changes to applicable law may adversely affect the use, transfer, exchange, or value of any of your crypto assets, and such changes may be sudden and without notice.*

*Please note that this Crypto Asset Statement may not be exhaustive of all risks associated with trading AVNT. Please review the [Risk Statement](#) and [Fee Schedule](#) for additional discussion of general risks and transaction fees associated with the Crypto Contracts and Crypto Assets made available through the Canadian Platform. These materials are for general information purposes only and are not investment advice or a recommendation or solicitation to buy, sell or hold any crypto asset or to engage in any specific trading strategy. The information contained in this Crypto Asset Statement is based on publicly available information provided by third parties.*

#### What is Avantis and how does it work?

Avantis is a decentralized derivatives exchange protocol on Base (an Ethereum Layer-2 network). The project uses a vault buffer model to backstop liquidity-provider losses and automate pricing, enabling permissionless perpetual swaps without a central counterparty.

At the time of writing, the token is not live, but the team plans to have AVNT available for staking to secure liquidity providers against extreme market volatility, earning stakers periodic rewards in AVNT or USDC. AVNT will also grant holders governance rights to propose and vote on protocol upgrades, incentivize liquidity provision by distributing fee shares and emissions to AVNT-ETH and AVNT-USDC pools, and reward traders based on their on-chain trading activity.

#### Who is behind the project?

Avantis Foundation created and developed the project under the leadership of co-founders Harsehaj Singh, Cheng Wanli Peng and Raymond Dong.

## Tokenomics of AVNT

The total supply of AVNT is 1 billion tokens which is distributed as follows:

AVNT Allocation	AVNT tokens	% of Total supply
Team & Advisors	180 million	18%
Seed Investors	200,35 million	20,035%
Series A Investors	65,7 million	6.57%
Foundation (Reserve - MM, CEX/DEX)	78,95 million	7,895%
Foundation (Community Sale / Builder Grants)	50 million	5%
Airdrop	125 million	12,5%
Community - Future Incentives	300 million	30%
<b>Total</b>	<b>1 billion</b>	<b>100%</b>

## General Risks

Like all other digital assets, there are some general risks to investing in AVNT. These include short history risk, volatility, and liquidity risk, demand risk, forking risk, code defects, cryptography risk, regulatory risk, concentration risk, electronic trading risk and cyber security risk. For more information on general risks associated with smart contracts and digital assets, see [Kraken's Risk Statement](#).

## Risks specific to AVNT

### *Competition*

Avantis Protocol faces competition from other decentralized derivatives platforms such as Perpetual Protocol, dYdX, and others. AVNT's value derives from its broader adoption in the market. If Avantis Protocol fails to achieve sufficient adoption compared to the other options in the market, this could negatively impact the value of AVNT.

## Due Diligence

Prior to listing on the Kraken platform, Kraken performed due diligence on AVNT and determined that AVNT is unlikely to be a security or derivative under Canadian securities legislation. Our analysis generally includes, but is not limited to, reviewing publicly available information on the following:

- The creation, governance, usage and design of AVNT, including the source code, security and roadmap for growth in the developer community and, if available, the background of the developer(s) that created AVNT;
- The supply, demand, maturity, utility and liquidity of AVNT;
- Material technical risks associated with AVNT, including any code defects, security breaches and other threats concerning AVNT and its supporting blockchain (such as the susceptibility to hacking and impact of forking), or the practices and protocols that apply to them; and
- Legal and regulatory risks associated with AVNT, including (i) any pending, potential, or prior civil, regulatory, criminal, or enforcement action relating to the issuance, distribution, or use of

AVNT, and (ii) consideration of statements made by any regulators or securities regulatory authorities in Canada, other regulators of the International Organization of Securities Commissions, or the regulator with the most significant connection to AVNT about whether AVNT, or generally about whether the type of crypto asset, is a security and/or derivative.
