CRYPTO ASSET RISK DISCLOSURE

Infinity Ground (AIN)

Last updated on September 10, 2025

Disclaimer

Please note that this risk disclosure is not exhaustive of all risks associated with trading AIN. Investors should perform their own assessment to determine the appropriate level of risk for their personal circumstances. Be sure to do your own research and due diligence while taking into account your own financial situation and risk tolerance. Please review the [Risk Summary](#) for additional discussion of general risks associated with the assets made available in the platform. These materials are for general information purposes only and are not investment advice or a recommendation or solicitation to buy, sell or hold any crypto asset or to engage in any specific trading strategy. The information contained in this risk disclosure is based on publicly available information that may be inaccurate, incomplete, or change at any time.

What is Infinity Ground (AIN) and how does it work?

Infinity Ground is a Web3 and AI-powered development platform that lets users build apps, mini-games, and interactive experiences using natural-language prompts instead of coding. The team describes its Agentic IDE (Integrated Development Environment) as a low-code tool for creating and publishing applications to an AI-driven app store. The project is also building the ING Network, an application chain designed to run as a Layer-2 on Initia, where users can bridge assets, deploy apps, and participate in seasonal rewards.

The AIN token is the native asset of the Infinity Ground ecosystem. Currently, it is used for payments, transaction fees, access to AI tools and services, as well as staking.

Who is behind AIN?

Infinity Ground was founded in 2024 by Lani Zhang and Adi Vivek, with Lani Zhang serving as CEO.

Tokenomics of AIN

AIN has a total supply of 1 billion tokens. The initial allocation was distributed as follows:

Category	Allocation
Private Sales	9.9%
Partners & Creators	28.0%
Treasury	20.0%
Liquidity	3.0%
Team	10.4%
Advisors	2.6%

Community Incentives	15.0%
Marketing	11%
Token Swap	0.1%
Total	100%

General Risks

Like all other digital assets, there are some general risks to investing in AIN. These include short history risk, volatility risk, liquidity risk, demand risk, forking risk, code defects, cryptography risk, regulatory risk, concentration risk, electronic trading risk and cyber security risk. For more information on general risks associated with smart contracts and digital assets, see Kraken's Risk Statement.

Risks Specific to AIN

Competition

The Infinity Ground platform faces competition from other AI decentralized platforms such as Fetch.ai, and SingularityNET. AIN's value derives from its broader adoption in the market. If the Infinity Ground platform fails to achieve sufficient adoption compared to the other options in the market, this could negatively impact the value of AIN.

Due Diligence

Prior to listing on the Kraken platform, Kraken performed due diligence on AIN and determined that AIN is unlikely to be a security or derivative under UK securities legislation. Our analysis generally includes, but is not limited to, reviewing publicly available information on the following:

- The creation, governance, usage and design of AIN, including the source code, security and roadmap for growth in the developer community and, if available, the background of the developer(s) that created AIN;
- The supply, demand, maturity, utility and liquidity of AIN;
- Material technical risks associated with AIN, including any code defects, security breaches and other threats concerning AIN and its supporting blockchain (such as the susceptibility to hacking and impact of forking), or the practices and protocols that apply to them; and
- Legal and regulatory risks associated with AIN, including (i) any pending, potential, or prior civil, regulatory, criminal, or enforcement action relating to the issuance, distribution, or use of AIN, and (ii) consideration of statements made by any regulators or securities regulatory authorities in the UK, other regulators of the International Organization of Securities Commissions, or the regulator with the most significant connection to AIN about whether AIN, or generally about whether the type of crypto asset, is a security and/or derivative.

Don't invest unless you're prepared to lose all the money you invest. This is a high-risk investment and you should not expect to be protected if something goes wrong. [Take 2 mins to learn more.](#)
