CRYPTO ASSET RISK DISCLOSURE

UXLINK (UXLINK)

Last updated on September 6, 2026

Disclaimer

Please note that this risk disclosure is not exhaustive of all risks associated with trading UXLINK. Investors should perform their own assessment to determine the appropriate level of risk for their personal circumstances. Be sure to do your own research and due diligence while taking into account your own financial situation and risk tolerance. Please review the [Risk Summary](#) for additional discussion of general risks associated with the assets made available in the platform. These materials are for general information purposes only and are not investment advice or a recommendation or solicitation to buy, sell or hold any crypto asset or to engage in any specific trading strategy. The information contained in this risk disclosure is based on publicly available information that may be inaccurate, incomplete, or change at any time.

What is UXLINK and how does it work?

UXLINK is a Web3 social infrastructure platform focused on creating a decentralized social ecosystem that integrates users' real-world social connections into blockchain-based applications. The project claims it lets users "link, share, and trade" across multiple blockchains without managing different wallets or gas tokens. According to the project's roadmap, UXLINK is deploying its own Optimistic-Rollup chain, UXLINK One Chain, bridging to Ethereum, BNB Chain, Polygon, TON and others, while a "One Account" smart-account system abstracts those networks behind a single social login.
UXLINK is the platform's native token. Holders receive governance rights via Snapshot and may use the token to pay universal gas fees, developer API charges or in-app service fees.

Who is behind the project?

The core team includes founder and CEO Rolland Safort Ntague, CTO and founder Bob Ng and founder Sean Sun (a.k.a Sun Shuo).The core operating company behind UXLINK is Happy Fair Pte Ltd.

Tokenomics of UXLINK

Total token supply is 1,000,000,000 UXLINK; this is a protocol constant and is unchanged. Following a September 22, 2025 exploit of UXLINK's multisignature admin wallet, the project migrated the token from its original contract on Arbitrum One to a new contract on Ethereum mainnet. The legacy Arbitrum contract is deprecated and holders of legitimately circulated tokens were offered a 1:1 swap into the new contract. As of early 2026, the circulating supply is approximately 857 million UXLINK according to CoinGecko.

General Risks

Like all other digital assets, there are some general risks to investing in *UXLINK*. These include short history risk, volatility risk, liquidity risk, demand risk, forking risk, code defects, cryptography risk, regulatory risk, concentration risk, electronic trading risk and cyber security risk. For more information on general risks associated with smart contracts and digital assets, see Kraken's Risk Statement.

Risks specific to UXLINK

Competition
UXLINK faces competition from other blockchain-based Web3 social infrastructure protocols. UXLINK's value derives from its broader adoption in the market. If UXLINK fails to achieve sufficient adoption compared to the other options in the market, this could negatively impact the value of UXLINK.

Due Diligence

Prior to listing on the Kraken platform, Kraken performed due diligence on UXLINK and determined that UXLINK is unlikely to be a security or derivative under UK securities legislation. Our analysis generally includes, but is not limited to, reviewing publicly available information on the following:

- The creation, governance, usage and design of UXLINK, including the source code, security and roadmap for growth in the developer community and, if available, the background of the developer(s) that created UXLINK;
- The supply, demand, maturity, utility and liquidity of UXLINK;
- Material technical risks associated with UXLINK, including any code defects, security breaches and other threats concerning UXLINK and its supporting blockchain (such as the susceptibility to hacking and impact of forking), or the practices and protocols that apply to them; and
- Legal and regulatory risks associated with UXLINK, including (i) any pending, potential, or prior civil, regulatory, criminal, or enforcement action relating to the issuance, distribution, or use of UXLINK, and (ii) consideration of statements made by any regulators or securities regulatory authorities in the UK, other regulators of the International Organization of Securities Commissions, or the regulator with the most significant connection to UXLINK about whether UXLINK, or generally about whether the type of crypto asset, is a security and/or derivative.

Don't invest unless you're prepared to lose all the money you invest. This is a high-risk investment and you should not expect to be protected if something goes wrong. [Take 2 mins to learn more.]
